

## The AI Evidence Audit Checklist

A structured, field-tested checklist that helps researchers and knowledge workers classify every AI-generated claim as verified, inferred, or hallucinated before it enters a document, report, or decision. Validated in the LegiPro Mirofish pilot across 34 dossiers and 68 turns.

### Deliverables:

- 50-item audit checklist (PDF + Notion template)
- 4-tier classification rubric: Verified / Inferred / Plausible / Hallucinated
- Quick-reference card (1-page printable)
- 5 worked examples across disciplines
- LegiPro pilot evidence notes

Audience: Researchers, knowledge workers, consultants, policy teams, and any professional using AI in evidence-critical writing who needs a defensible classification trail before output enters a document or decision.
